PROFILE

I'm the student that he is itching to learn about everything sciences, technology ,art, web design. In fact, Science is the area of excitement and huge adventures. For this, my personal satisfaction, fulfillment and enjoyment reside in following its path and being the conqueror of all its secrets . I'm responsible, helpful and hard-worker programmer.Moreover, I'm a sociable person, I have many friends since I like communicating with people and working within teams. That's the main reason that incites me to participate in different events like StartUp WeekEnd, Innovation Camp by INJAZ and Public Speaking Workshops.

INTERESTS

1. Hackathons / Events

I participate in different events that make me feel like an adventurer. I sleep on tables/floors/whatever I can find, spending sleepless nights in the front of the computer screen with friends making our ideas real. Furthermore, Organizing events helped me to develop new skills about the principal software and the main data of real life.

2. Inspiration

I like Innovation and Creative things so I keep always myself up to date with contemporary currents and events by watching innovative and creative videos which inspire me, I am the biggest lover of the Behance website discovering creative ads or arts, I think that it helps me a lot to perceive things differently and from all sides. Then, improving this ability stimulates me to getting out of my comfort's box in many different situations.
